I am looking at your 14 pages dated July 14, 2017, especially the top of your page 3 that identifies the OMRF and the OMCF. Simple enough.

Mr. Tackett's drawings seen in the presentation to the Alameda County Waste Management Agency on February 22, 2017, shows four parts within the compostable reception areas. His drawings include what you do the OMRF (called in February "Food Waste Organic Recycling Facility") and the OMCF (called in February the "Food Waste/Organic/ Green Waste Compost Facility") but his drawings show two other parts of the building labelled as "Green Waste Enclosure" (lower right) and "Food/Green Waste xxxx [not readable] Floor"

The problem with this project has been that Mr. Tackett has changed his mind many times about what he intends to do and doesn't seem to realize that the public wants him to have a plan so we can understand and comment on it.

The more you dig, the more you will see the shifting character of this project and we will tell you more as we go along.

Respectfully,

Arthur R. Boone
